

WORDENTEC

Systems and Upgrades

WAVE Thin Film

Wave control architecture
and software guarantees
production of the highest
quality devices

A stable, reliable platform
for the most complex
thin film designs

- precision optics
- ion beam
- plasma assist
- semiconductor
- new systems
- system upgrades

Coating Systems

We are fully equipped to demonstrate the new generation of wave coating systems and provide ongoing support for older coating technologies within the precision optics, ophthalmics and semiconductor industries.

We continue to provide high vacuum and ultra high vacuum systems for specialist applications within the aerospace, defence and solar industries.

Wordentec systems are used worldwide in research, development and production.

We pride ourselves on our reputation for providing our customers with equipment of the highest quality, on time and on budget. Our professional and friendly approach coupled with application specific knowledge and a vast wealth of expertise make wordentec a great choice of partner
